Physical	
Operating Temp.	-4°F~158°F (-20°C~+70°C)
Dimension	32x32mm
Hole Pitch	28x28mm
Connector No.	ZHR-4
Cable Length	3.3ft (1M)

INTRODUCTION

About Arducam

Arducam has been a professional designer and manufacturer of SPI, MIPI, DVP and USB cameras since 2012. We also offer customized turnkey design and manufacturing solution services for customers who want their products to be unique.

About this USB Camera

The UB0234 is a new member of the Arducam's USB camera family. It's a 2MP, UVC compliant, wide angle USB 2.0 camera. This USB camera is based on the 1/2.7" OV2710 image sensor, and you can read more about its specs in the next chapter. Arducam also provides the sample application that demonstrates some of the features of this camera.

About UVC

The UB0234 is a UVC-compliant camera. The native UVC drivers of Windows, Linux and Mac shall be compatible with this camera so that it does not require extra drivers to be installed.

About Customer Service

If you need our help or want to customize other models of USB cameras, feel free to contact us at support@arducam.com

QUICK START

How to download the program

Download the APP Amcap from the following link https://www.arducam.com/downloads/app/AMCap.exe

NOTE:

1. If used with the Andriod device, USB Camera APP and connect adapter are needed.

2. For Mac OS, please open the native software facetime and select the video camera "hRQ-Camera" .

How to connect the camera

Connect the one end of the USB 2.0 cable to the USB 2.0 connector provided on the back of UB0234, and connect the other end to the USB 2.0 host controller on the computer.

How to use the program (Windows demo only)
